

State Bridge Road at Medlock Bridge Road

Road Capacity Improvements

PROJECT OVERVIEW

Extending turn lanes on westbound State Bridge Road in both directions onto Medlock Bridge Road.

PROJECT TIMELINE

Construction is expected to be complete in mid-July.

KEY POINTS

- Remove island barriers in far right westbound lane of State Bridge Road from Camden Way to Medlock Bridge Road, which extends the right-turn lane by a quarter-mile.
- Extend a left-turn lane on westbound State Bridge Road from Camden Way turning south on Medlock Bridge Road.
- Will move more turning traffic from the through-lanes, reducing back-ups and expediting traffic flow.
